Portland, OR 97201-5187

To whom it may concern

I am interested in Vestas because I am excited about renewable energy. I think becoming involved in the industry is not only financially prudent, but also socially responsible. I see working for Vestas as a way to make our world a better place.

I have experience programming in a behavioral genetics laboratory at Reed College under the direction of Professors Susan C. P. and Albyn Jones. In my research with them, I solved applied problems having to do with the interpretation of data using *R*, a computer language new to me at the time. I found the work satisfying, so much so that my last subject of study at the laboratory evolved naturally into my senior thesis in statistics. Since graduating in December, I have been pursuing computer science and programming (using the computer languages Haskell and Scala), auditing courses at Reed and learning about the UNIX operating system.

I am detail oriented, patient, and, because of my rigorous education, accustomed to tackling multiple projects simultaneously. I have strong social skills, as evidenced by my four years as a member of the Reed College ultimate frisbee team and a recent volunteer position as an outdoor trip student leader. Sharp and calm, I am a goal-oriented, team player. I would appreciate the opportunity to discuss my background and a position at Vestas with you, either over the phone or in person. I can be reached by phone at (714) 362 6823 or by email at andywinterman@gmail.com.

Thank you for reviewing my application.

Sincerely,
Andrew Winterman
